

Fairbridge Technologies supply a range of purpose-built **data acquisition systems**, allowing users to effectively log various statistical data values in the field with a convenient portable system.

Our range includes the following solutions:

- **Fourtec DaqPRO**
- **Fourtec DaqLink**
- **Escort Thermocheck**

Data Acquisition systems are best suited to logging applications where a portable system with a large range of inputs and high memory capacity is needed. System like the DaqPRO even allows users to view and professionally analyse the logged data on the device itself.

The following parameters can for example be logged by these devices:

- Temperature (spanning a range of over  $-250^{\circ}\text{C}$  to  $+1200^{\circ}\text{C}$ )
- Humidity
- Voltage
- Current
- Impulse
- Frequency
